EMERGO Metal Treatment

INNOSOFT B570 – RUST REMOVER

Remove rust and rust stains from stainless steel

Innosoft B570 is a special deep cleaner to remove rust from stainless steel and non-ferrous metals. Innosoft B570 is a white viscous fluid based on organic acids and surface active agents, non-abrasive and with a pH level of 3. It is suitable for intensive cleaning of contaminated surfaces like flash rusting and other rust stains.

INNOPROTECT B580 – CONDITIONER

A stainless steel maintenance cleaner

Innoprotect B580 is a neutral and mild cleaner, especially suitable for the maintenance of stainless steel. In addition to the cleaning action and removing loose oxides and contaminations this solution will also leave a protective layer in order to prevent new corrosion from forming as effectively as possible. Innoprotect B580 is a powerful stainless steel cleaner suitable for daily maintenance of lightly contaminated surfaces.

INNOSPRAY B600 – STAIN REMOVER

Removing stains from stainless steel

Cleaning stainless steel becomes easy with Innospray B600. This cleaner is ready to use on waterproof surfaces. It is especially suited for removing (grease) stains and fingerprints. By first spraying Innospray B600 on a micro fiber cloth and then wiping the stainless steel, it will leave no streaks. This stainless steel cleaner is easy to use and suitable for the day to day maintenance of waterproof surfaces such as banisters, elevators, kitchens, etc.

INNOGEL B450 – BIODEGRADABLE RUST REMOVER

Easy-to-use rust remover for stainless steel

Innogel B450 is a special stainless steel cleanser that removes rust easily from stainless steel. Removing rust with Innogel B450 takes little effort and has the advantage that, even surfaces that are hard to reach, are easy to clean. Innogel B450 can be sprayed and will be divided on the surface with a brush or a sponge. After a short time, the gel can be washed away and the rust and other contaminants will be gone with the gel.

RUST STARTERSKIT

Ready to use kit with products for rust treatment

In addition to the separate products we sell, we also offer a special rust treatment kit. This kit will allow you to quickly and efficiently remove (flash) rust and other contaminations from stainless steel. The rust treatment kit contains two products, Innosoft B570 and Innoprotect B580. Innosoft B570 will remove the rust and Innoprotect B580 will ensure all loose rust and oxides are removed, as well as leaving a protective layer. This last part is beneficial to prevent new corrosion from occurring as effectively as possible.

Contents of the kit

- innosoft B570
- innoprotect B580
- sponge
- gloves
